Thanks, Amy and Lilly.

I'd add that outreach opportunities such as these are perfect for Dr. Higley to engage. Maybe we should start by forwarding their names and contact information to Kathy, or advise them to give her a call.

R, Bill

Lily,

Tamsen, Karen Cohn and I will reach out to the Police and Crime Lab tenants. We have had many meetings and informational sessions with them over the years about their expressed concerns about NOA and radiation because of the press about those issues. We will include their own Health and Safety (Industrial Hygienist) assigned to their department and work with their union representatives. In the past, we have been able to gain and/or restore trust that the Navy CERCLA process and oversight continues to protect their health.

sincerely,

Amy Brownell, P.E.

Subject: Workers at State Parks and Police Dept concerned about exposure

I recently received two voicemails from Nate Tucker, a supervisor at State Parks & Rec. He said that his staff workers at the Candlestick Park/Yosemite Slough area, next to Parcel E-2, have expressed concerns about exposure to radiation while they are working, especially with the Parcel E-2 work ongoing. I have called him three times at 916-651-9171 <tel:916-651-9171> and left voicemails. In addition, Jackie and I talked with another State Parks & Rec staff person in person at the last EJ Task Force meeting.

Also, David Yogi reminded me this morning that several Police Dept. workers attended the 2/8 community meeting and told us they had concerns about their potential exposure.

We recommend reaching out to these groups of workers to address their concerns. Let's discuss at tomorrow's 1 pm meeting.

Lily Lee
